

## LABORATORY RESULT

| PATIENT INFORMATION         |                    |                        |                       |
|-----------------------------|--------------------|------------------------|-----------------------|
| <b>Name:</b>                |                    | <b>Date Requested:</b> |                       |
| <b>Age/Sex:</b>             | <b>DOB:</b>        | <b>Date Released:</b>  |                       |
| <b>Address:</b>             | <b>Contact No:</b> | <b>Patient ID:</b>     | <b>PhilHealth No:</b> |
| <b>Referring Physician:</b> |                    |                        |                       |

| MICROBIOLOGY / CULTURE & SENSITIVITY |                        |
|--------------------------------------|------------------------|
| <b>Specimen Type:</b>                | <b>Date Collected:</b> |
| <b>Site / Source:</b>                | <b>Date Received:</b>  |

| TEST                    | RESULT | UNITS  | REFERENCE RANGE |
|-------------------------|--------|--------|-----------------|
| <b>GRAM STAIN</b>       |        |        |                 |
| Gram-Positive Organisms |        |        |                 |
| Gram-Negative Organisms |        |        |                 |
| WBC / Pus Cells Seen    |        |        |                 |
| <b>CULTURE RESULT</b>   |        |        |                 |
| Organism Isolated       |        |        |                 |
| Colony Count            |        | CFU/mL |                 |
| Preliminary Report      |        |        |                 |
| Final Report            |        |        |                 |

## ANTIBIOGRAM / SENSITIVITY RESULTS

| ANTIBIOTIC                | MIC | ZONE (mm) | INTERPRETATION |
|---------------------------|-----|-----------|----------------|
| Amoxicillin / Clavulanate |     |           |                |
| Ampicillin                |     |           |                |
| Azithromycin              |     |           |                |
| Cefazolin                 |     |           |                |
| Ceftriaxone               |     |           |                |
| Ciprofloxacin             |     |           |                |
| Clindamycin               |     |           |                |
| Co-trimoxazole (TMP-SMX)  |     |           |                |
| Doxycycline               |     |           |                |

| ANTIBIOTIC              | MIC | ZONE (mm) | INTERPRETATION |
|-------------------------|-----|-----------|----------------|
| Erythromycin            |     |           |                |
| Gentamicin              |     |           |                |
| Imipenem                |     |           |                |
| Levofloxacin            |     |           |                |
| Metronidazole           |     |           |                |
| Oxacillin               |     |           |                |
| Piperacillin-Tazobactam |     |           |                |
| Vancomycin              |     |           |                |
